UX Design student at the University of the Arts London, working across user research, interface design and visual design. I explore how people experience the world through qualitative research and systems thinking, then turn those insights into clear, engaging designs. With a background in illustration and freelance client work, I'm passionate about creating thoughtful, accessible experiences that balance user needs with wider social and ethical impact.

Skills:
Observation Studies, Secondary Research, Affinity Mapping, Stakeholder Mapping, Research Synthesis, Thematic Analysis, User-Centred Design, Wireframing, Prototyping, Information Architecture, Systems Thinking, Digital Design, Illustration.

Tools:
Figma, Miro, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Procreate, Maya, Substance Painter.

Selected UX Projects

Responsible Design Project

- Investigated ethical and societal implications of brain-computer interface technology through systems analysis and various responsible design methods.
- Conducted extensive secondary research into cognitive data collection, user autonomy and digital ethics.
- Developed capability, responsibility and power maps to identify hidden relationships between users, organisations and technological systems.
- Applied Double Diamond research methods to frame complex design challenges and communicate insights through visual and written outputs.

Museum Audio Experience Research

- Conducted observational research and autoethnographic analysis within the Wellcome Collection to investigate visitor engagement with interactive audio experiences.
- Analysed visitor behaviour, dwell times and interaction patterns across multiple exhibits, including audio-based installations.
- Synthesised qualitative findings to explore how sound influences participation, identity and meaning-making within museum environments.
- Developed and refined research questions through iterative analysis and critical reflection.

UI Design & Interactive Prototyping

Online UI/UX Design Course | Figma

- Designed multiple website interfaces, including landing pages, sign-up forms and dashboards, applying visual hierarchy, typography, colour theory and layout principles.
- Developed responsive interface layouts for desktop, tablet and mobile, adapting content structure and navigation across different screen sizes.
- Created interactive Figma prototypes and explored light/dark mode transitions, demonstrating an understanding of interface behaviour and visual consistency.

Experience

Royal Engineers Museum

- Researched and developed the concept for a military vehicle inspired by the museum's collection and historical context.
- Translated research and project requirements into visual concepts, refining the design through development and feedback.
- Collaborated with a 3D developer to communicate the vehicle's concept and supported its transition from 2D design into a 3D asset.
- The vehicle was showcased in an exhibition by the museum.

The Historic Dockyard Chatham

- Selected as one of a handful of students to create concept art of one of the dockyard's ships.
- Created concept art of HMS Terror, inspired by the Northwest Passage expedition, using Photoshop and Ibis Paint.
- The finished piece was displayed in the dockyard's exhibition to the public.

Freelance Digital Designer

- Delivered commissioned visual design work including album artwork, branding assets, promotional graphics and website designs.
- Collaborated directly with clients to understand requirements, present concepts and incorporate feedback throughout the design process.
- Managed multiple projects and deadlines, balancing client requirements with visual quality and consistent delivery.

Education

University of the Arts London

BA User Experience Design 2025–2028

Midkent College

UAL Level 3 Extended Diploma in Creative Practice Art, Design and Communication 2023–2025

Greenacre School

8 GCSEs including Mathematics (7) and English (7) 2017–2022
